

just teach — once by notes — and go right in.

Dum dee dum dee dum lee dum dee dum dee dum

X
voices come together here

After a while of this: add a beat (x) at the end before starting again.

In order for the 2nd voice to also come in on the 2nd beat,
 she will have to add 2 extra beats.
 So then the first voice adds one more beat! making it
 3, and the 2nd voice adds 4. This pushes
 it up to the last beat, and it can be held here
 a little while because when it goes forward
 again (either one of the voices) they will come
 on the unison, at which — once — stop.
