Take a guitar out to a meadow, field, or any grassy area of your choosing, preferably by yourself.

- Sit down with your back to the sun (or moon, depending on the day) and hold the guitar flat on your lap with the face of the instrument facing the sky.

- Pluck a single blade of grass from the Earth and weave it underneath the low E string (if the low E string should be missing, the A string will suffice).

- Holding each end of the blade of grass with your index and middle fingers, gently scrape the blade of grass from the sand hole to the head stock.

- Repeat until the grass rips in half.
I consider myself a reasonable girl always doing my best to be kind but sometimes I find I'm dealing with what's obviously true

Dear friend, I learned this the hard way with you

You're just a bitch

To put it plain and simple, you're a bitch

I've tried to be kind but struggle to find a reason to persist. Because at the end of the day you really are just a bitch
