Some extraterrestrial beings visit planet Earth to observe human behaviour. Upon returning home their leader asks them:

How are we different from them?

"And they have to sleep regularly!"

"Eew! Fred sleeps with his eyes open. Look! To regain their energy!"

"And they have been waging wars since their beginning of time!"

"Humans all have to eat regularly!"

"They also procreate by making love!"

"But there was one thing the humans do that we don't quite understand!"

"Every so often they come together and vibrate the air!"
